

Securing UI Elements Using Spring Security

Bryan Hansen

DIRECTOR OF SOFTWARE DEVELOPMENT

@bh5k

isAuthenticated

```
<sec:authorize access="isAuthenticated()">  
    Welcome Back, <sec:authentication property="name" />  
</sec:authorize>
```

Current User

```
@PostMapping("registration")
@Secured("ROLE_USER")
public String addRegistration(@Valid
    @ModelAttribute("registration") Registration
    registration, BindingResult result, Authentication auth)
{
    System.out.println("Auth: " + auth.getPrincipal());
    // ...
}
```
